

ABSTRACT OF THE INVENTION

This invention is directed to methods for treating systemic lupus erythematosus and/or inflammatory bowel disease such as Crohn's disease or ulcerative colitis in a patient which comprise administering a growth hormone secretagogue (GHS), prodrug thereof or a pharmaceutically acceptable salt of said GHS or said prodrug. More particularly, the present invention provides such methods wherein the GHS is a compound of Formula I:

or a prodrug thereof or a pharmaceutically acceptable salt of said GHS or said prodrug. This invention is also directed to combinations of a GHS and a second therapeutic agent, where said second therapeutic agent is known to be beneficial in the treatment of systemic lupus erythematosus and/or inflammatory bowel disease such as Crohn's disease or ulcerative colitis, to kits and pharmaceutical compositions comprising such a combination and to methods of treating systemic lupus erythematosus and/or inflammatory bowel disease such as Crohn's disease or ulcerative colitis using such combinations, pharmaceutical compositions and kits.
